PROFILE

5th year student in Computer Science, I am looking for a 24-week end-of-studies internship, starting from March 2027. My profile combines a broad software engineering foundation with strong interests in machine learning, computer vision, and applied mathematics. Adaptable, fast-learning, and eager to contribute across diverse development and research environments.

SKILLS

- **Languages:** French (Native Language), English (C1 - TOEIC Score 945)
- **Programming Languages:** Python, C++, Java, and SQL (Experienced). Rust (Beginner)
- **Libraries:** NumPy, scikit-learn, PyTorch, TensorFlow

EDUCATION

- **Polytech Paris-Saclay, Paris-Saclay University** 09/2024 - 09/2027
Engineering degree in Computer Science and applied Mathematics. Relevant coursework: Software Development, Data Science, UML, Databases, OS, Computer Graphics, HCI, Logic, ...
- **Linköping University, Sweden** 09/2025 - 01/2026
Erasmus semester. Coursework in: Advanced Databases, AI, Compiler, Networks, and Management
- **Polytech Angers, Angers University** 09/2022 - 06/2024
Two years of advanced studies to prepare for entry exams to top universities.

WORK EXPERIENCE

- Research Internship, LISN/INRIA, Orsay** 04/2026 - 08/2026
 - Reviewed literature about crowd-sourced geospatial datasets plausibility
 - Implemented an interactive platform to visualise trajectories and their anomalies
 - Implemented a machine learning pipeline to automate abnormal trajectories detection
- Summer Work, Sodebo, Montaigu** 06/2024 - 08/2024

PERSONAL PROJECTS

- Predictive Maintenance Software (6 months)**
 - Developed an intuitive Python GUI in pairs
 - Implemented machine learning technologies for supervised learning (sklearn)
- 3D Space Shooter (3 months)**
 - Coded a 3D game in C++ using OpenGL technology
 - Designed software structure and planned team development

VOLUNTEER WORK

- **Amateur Theater Troupe, Les Chercheurs d'Art** (12 years)
- **Listener and Treasurer, Nightline Saclay** (1 year)
